CHANGED TITLE PUZZLE

The artist has misspelled the title of his picture. Can you correct it into an appropriate word by changing one letter?

ANSWER TO PUZZLING PARTNERSHIPS. It would seem at the first blush as if any number of fish from 33 to 43 might have been caught, as one may try experimentally by giving A from O to 11 fish. and the quantities to be received by the others become apparent. There being five partners, nowever, who are to receive equal amounts in the final division, it is clear that the number must be 35 or 40. Take the latter number, and it readily solves and shows that A had S, B S, C 14, D 4 and E S. Now, if B, C and D pool their issues, making 21, each gets 8, after which, no matter how many join and then divide their stocks, the shares remain 8; but if any number is experimented with, even if the fish could be chopped up, it resolves itself into an odd complication.

APARTMENTS TO LET.
